Post Election Analyzer

Django MTV application for senatorial result exploration

Home | Senators | Compare

ACTIVE DATASET **senate25-final_updated.csv** — Current database source

Dataset Notes

- For NCR records, the source dataset uses Manila and district groupings in the Province field.
- The geographic heat maps use locally cached faeldon 2023 low-resolution Philippine GeoJSON files rendered as inline SVG choropleths where matching map boundaries are available.

DJANGO MTV APPLICATION

Senatorial Post Election Analysis

Explore senator profiles, cascading Region to Province to Municipality filters, Chart.js breakdowns, Leaflet choropleths, compare-two-senators views, and barangay drilldowns from the uploaded post-election dataset.

IMPORTED SENATOR PROFILES	AVAILABLE REGIONS
